2.4,4.9~5.8Ghz Int

433Mhz Swivel

W-Lan Patch

Quad Band PCB MMCX

GSM 3G Internal

3Dbi Gain Outdoor

Active GPS Patch with

Data Cables

Ribbon Cables

ADACTUS

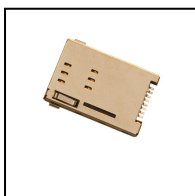

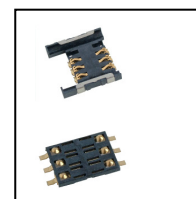

SIM Holders

The ADACTUS Range of SIM Card Holders offers a strong portfolio covering most M2M Applications. These products offer many benefits over established names with flexibility and commercial benefits. The ranges have an operating temperature of -25c ~+85c and meet Industry standards.

The Hinged range of SIM Holders are ideally suited to Mobile products where Vibration is a potential problem. This range also offers Detection PIN and locking options

Low Cost options are available with the Simple SIM options which include a Detection PIN and also OPEN type where size is critical.

The Industry Favourite style **Push/ Push** with a locking mechanism is also available from BT2000. Low Profile and low cost this product is a firm favourite in the M2M Market today.

Where External SIM Access is required BT2000 offer the SIM022, simply place the SIM in the tray.

Standard RF Cable Assemblies

MMCX R/A	SMA Bulkhead Jack	127mm
