

BVM LTD

BVM Distribution

BVM partners with a number of major manufacturers to act as their distributor for the British Isles [UK and Ireland]. BVM is not just a box shifter, in many cases prior to despatch BVM will provide some form of addition configuration to add value to the item because of a special requirement from the customer.

BVM has an extensive stock in our UK warehouses including service, technical and sales support plus supply is all performed under our ISO9001 certified quality assurance procedures.

a wide range of products from Industrial PC (IPC) motherboards of various form factors to embedded systems and Panel PCs and we will work closely with you to ensure that you get the product to the specification you want and need.

BVM OEM / ODM

From concept to design through development and production, BVM offers a full OEM / ODM design and build service.

The concept, design, development and small batch production is operated from our UK premises near Southampton because we believe it is good for our engineers to be easily accessible throughout this process.

Once the products and production processes are firmly established BVM will work with our partners to take profitability to the next level and to jointly act together to keep ahead of the competition.

BVM Mobile & M2M

BVM recognised early on the emerging technology and growth of the mobile and M2M sector so set up a separate division specifically aimed at supporting our customers and partners to access this channel.

A collection of products have been created by BVM and our partners in order to have a full offering available and to ensure an excellent "out of the box experience" for the end-user.

Aimed at the various sectors such as Transport, Surveillance, Medical, Digital Signage, M2M, Security and many more.
